CIRCULATION

An Official Journal of the American Heart Association, Inc.
7320 Greenville Ave., Dallas, Texas 75231

EDITOR-IN-CHIEF
Elliot Rapaport, M.D., *San Francisco, California*

ASSOCIATE EDITORS
Melvin D. Cheitlin, *San Francisco, California*
Joel S. Karliner, *San Francisco, California*
William W. Parmley, *San Francisco, California*
Melvin M. Scheinman, *San Francisco, California*

Managing Editor
Margaret A. Inman

Assistant Editor
Stephen Ordway

Supplements to CIRCULATION are published occasionally and may be bound with each volume. The first supplement in a volume begins with page I-1. The second supplement would begin with page II-1. Volume index issues include a separate supplement index whenever supplements have been published in that volume.

PUBLICATIONS COMMITTEE, AMERICAN HEART ASSOCIATION

ROBERT M. BERNE, *Chairman*
Charlottesville, Virginia

Francois M. Abboud
Iowa City, IA

John T. Baker
Chicago, IL

H.J.M. Barnett
London, Ontario, Canada

Edwin L. Bierman
Seattle, WA

Mary Jo Burgess
Salt Lake City, UT

Harriet P. Dustan
Birmingham, AL

John W. Evers
Chicago, IL

Thomas P. Graham, Jr.
Nashville, TN

Louise Mansfield
Seattle, WA

Frank I. Marcus
Tucson, AZ

Circulation

VOLUME 65

January-June, 1982

Calcium-entry Blockers in Coronary Artery Disease

No. 1 (January)

Calcium-entry Blockers in Coronary Artery Disease. Introduction
Jay N. Cohn I-1

Ion Channels in Membranes
Arnold M. Katz, Frank C. Messineo, and Leo Herbette I-2

Calcium-entry Blockers and Vascular Smooth Muscle
Paul M. Vanhoutte I-11

Effect of Diltiazem on Myocardial Blood Flow
Robert J. Bache and Daniel J. Dymek I-19

The Pathophysiology of Angina Pectoris and the Effect of Lidoflazine
Fredarick L. Gobel, Leonard A. Nordstrom, Richard R. Nelson, and Yang Wang I-27

Beneficial Effects of Nifedipine on Regional Myocardial Blood Flow in Patients with Coronary Artery Disease
Robert F. Malacoff, Beverly H. Lorell, Gilbert H. Mudge, Jr., B. Leonard Holman, John Idoine, Louis Bifolck, and Peter F. Cohn I-32

Considerations in Evaluating New Antianginal Drugs
Alfred F. Parisi, William E. Strauss, Kevin M. McIntyre, and Arthur A. Sasahara I-38

The Effects of Lidoflazine on Exercise Performance and Thallium Stress Scintigraphy in Patients with Stable Angina Pectoris
William Shapiro, Kenneth A. Narahara, and Janet Park I-43

Superiority of Verapamil to Propranolol in Stable Angina Pectoris: A Double-blind, Randomized Crossover Trial
William H. Frishman, Neal A. Klein, Joel A. Strom, Howard Willens, Thierry H. LeJemtel, John Jentzer, Louis Siegel, Philip Klein, Neil Kirschen, Ralph Silverman, Simcha Pollack, Ralph Doyle, Edward Kirsten, and Edmund H. Sonnenblick I-51

Consensus Development Conference on Coronary Artery Bypass Surgery: Medical and Scientific Aspects

No. 2 (June)

Consensus Development Conference on Coronary Artery Bypass Surgery: Introduction
Robert L. Frye, Peter L. Frommer, and David B. McCallum II-1

Medical Management of the Patient with Angina Pectoris: An Overview of the Problem
T. Joseph Reeves II-3

(Continued)

Management of the Patient with Coronary Artery Disease. A Surgeon's Perspective
Vallee L. Willman II-13

Exercise Testing as Part of the Reasonable Workup Before Recommending Medical or Surgical Therapy for Coronary Heart Disease
Victor F. Froelicher II-15

The Reasonable Workup Before Recommending Medical or Surgical Therapy: An Overall Strategy
Gottlieb C. Friesinger II-21

Problems and Advantages of an Observational Data Base Approach to Evaluating the Effect of Therapy on Outcome
Robert A. Rosati, Kerry L. Lee, Robert M. Califf, David B. Pryor, and Frank E. Harrell, Jr. II-27

Comparison of Medical and Surgical Management of Coronary Artery Disease: Methodologic Issues
James H. Ware II-32

Results of Myocardial Revascularization: A 12-year Experience
Delos M. Cosgrove, Floyd D. Loop, and William C. Sheldon II-37

Survival After Coronary Artery Bypass Surgery in Specific Patient Groups
Gerald M. Lawrie and George C. Morris, Jr. II-43

Survival of Coronary Artery Disease Patients with Stable Pain and Normal Left Ventricular Function Treated Medically or Surgically at Duke University
Robert E. Whalen, Frank E. Harrell, Jr., Kerry L. Lee, and Robert A. Rosati ... II-49

Comparison of Survival of Medically and Surgically Treated Coronary Disease Patients in Seattle Heart Watch: A Nonrandomized Study
K.E. Hammermeister, Timothy A. DeRouen, and Harold T. Dodge II-53

The Veterans Administration Cooperative Study of Stable Angina: Current Status
Timothy Takaro, Herbert N. Hultgren, Katherine M. Detre, and Peter Peduzzi II-60

Prospective Randomized Study of Coronary Artery Bypass Surgery in Stable Angina Pectoris: A Progress Report on Survival
European Coronary Surgery Study Group II-67

Unstable Angina Pectoris: Management Based on Available Information
Richard O. Russell, Jr., Charles E. Rackley, and Nicholas T. Kouchoukos II-72

Aortocoronary Bypass Grafting: An Internist's Perspective
Henry D. McIntosh II-77

Institutional Variations in Influencing Results: Arterial Versus Venous Grafts
John L. Ochsner II-81

Institutional Variation of Coronary Artery Bypass Graft Surgery: Emphasis on Myocardial Protection
George C. Kaiser II-85

Changes in Grafts and Coronary Arteries After Saphenous Vein Aortocoronary Bypass Surgery: Results at Repeat Angiography
Martial G. Bourassa, Lucien Campeau, Jacques Lésperance, and Claude M. Grondin II-90

Left Ventricular Performance Before and After Aortocoronary Artery Bypass Surgery
James H. Chesebro, Erik L. Ritman, Robert L. Frye, Hugh C. Smith, Ronald E. Vlietstra, and James R. Pluth II-98

Postoperative Exercise Response in the Evaluation of the Physiologic Status After Coronary Bypass Surgery
Shahbudin H. Rahimtoola II-106

Employment Status After Coronary Artery Bypass Surgery
Albert Oberman, John B. Wayne, Nicholas T. Kouchoukos, Edgar D. Charles, Richard O. Russell, Jr., and William J. Rogers II-115

Employment Status After Coronary Artery Bypass Surgery
Hugh C. Smith, LaVon N. Hammes, Sudhir Gupta, Ronald E. Vlietstra, and Lila Elveback II-120

National Institutes of Health Consensus Development Conference Statement on Coronary Bypass Surgery. Scientific and Clinical Aspects II-126

INDEX TO SUPPLEMENTS

SUBJECT INDEX

A

Angina pectoris
- Considerations in evaluating new antianginal drugs, I-38
- The effects of lidoflazine on exercise performance and thallium stress scintigraphy in patients with stable angina pectoris, I-43
- Medical management of the patient with angina pectoris: an overview of the problem, II-3
- The pathophysiology of angina pectoris and the effect of lidoflazine, I-27
- Prospective randomized study of coronary artery bypass surgery in stable angina pectoris: a progress report on survival, II-67
- Superiority of verapamil to propranolol in stable angina pectoris: a double-blind, randomized crossover trial, I-51
- Unstable angina pectoris: management based on available information, II-72
- The Veterans Administration Cooperative Study of Stable Angina: current status, II-60

Angiography
- Changes in grafts and coronary arteries after saphenous vein aortocoronary bypass surgery: results at repeat angiography, II-90

Artery, mammary
- Institutional variations in influencing results: arterial versus venous grafts, II-81

B

Blood flow, myocardial
- Beneficial effects of nifedipine on regional myocardial blood flow in patients with coronary artery disease, I-32
- Effect of diltiazem on myocardial blood flow, I-19

Bypass surgery
- Aortocoronary bypass grafting: an internist's perspective, II-77
- Changes in grafts and coronary arteries after saphenous vein aortocoronary bypass surgery: results at repeat angiography, II-90
- Comparison of medical and surgical management of coronary artery disease: methodologic issues, II-32
- Comparison of medically and surgically treated coronary disease patients in Seattle Heart Watch: a nonrandomized study, II-53
- Consensus Development Conference on Coronary Artery Bypass Surgery: introduction, II-1
- Employment status after coronary artery bypass surgery, II-115
- Employment status after coronary artery bypass surgery, II-120
- Institutional variation of coronary artery bypass graft surgery: emphasis on myocardial protection, II-85
- Institutional variations in influencing results: arterial versus venous grafts, II-81
- Left ventricular performance before and after aortocoronary artery bypass surgery, II-98
- Management of the patient with coronary artery disease. A surgeon's perspective, II-13
- National Institutes of Health Consensus Development Conference statement on coronary bypass surgery. Scientific and clinical aspects, II-126
- Postoperative exercise response in the evaluation of the physiologic status after coronary bypass surgery, II-106
- Prospective randomized study of coronary artery bypass surgery in stable angina pectoris: a progress report on survival, II-67
- Results of myocardial revascularization: a 12-year experience, II-37
- Survival after coronary artery bypass surgery in specific patient groups, II-43
- Survival of coronary artery disease patients with stable pain and normal left ventricular function treated medically or surgically at Duke University, II-49
- The Veterans Administration Cooperative Study of Stable Angina: current status, II-60

C

Calcium-entry blockers
- Calcium-entry blockers and vascular smooth muscle, I-11
- Calcium-entry blockers in coronary artery disease. Introduction, I-1

Coronary artery disease
- Beneficial effects of nifedipine on regional myocardial blood flow in patients with coronary artery disease, I-32
- Calcium-entry blockers in coronary artery disease. Introduction, I-1
- Comparison of medical and surgical management of coronary artery disease: methodologic issues, II-32
- Comparison of survival of medically and surgically treated coronary disease patients in Seattle Heart Watch: a nonrandomized study, II-53
- Exercise testing as part of the reasonable workup before recommending medical or surgical therapy for coronary heart disease, II-15
- Management of the patient with coronary artery disease. A surgeon's perspective, II-13
- Survival of coronary artery disease patients with stable pain and normal left ventricular function treated medically or surgically at Duke University, II-49

D

Diltiazem
- Effect of diltiazem on myocardial blood flow, I-19

Dog studies
- Effect of diltiazem on myocardial blood flow, I-19

E

Employment
- Employment status after coronary artery bypass surgery, II-115
- Employment status after coronary artery bypass surgery, II-120

Exercise testing
- The effects of lidoflazine on exercise performance and thallium stress scintigraphy in patients with stable angina pectoris, I-43
- Exercise testing as part of the reasonable workup before recommending medical or surgical therapy for coronary heart disease, II-15
- Postoperative exercise response in the evaluation of the physiologic status after coronary bypass surgery, II-106

I

Ion channels
- Ion channels in membranes, I-2

L

Left ventricle
- Left ventricular performance before and after aortocoronary artery bypass surgery, II-98
- Survival of coronary artery disease patients with stable pain and normal left ventricular function treated medically or surgically at Duke University, II-49

Lidoflazine
- The effects of lidoflazine on exercise performance and thallium stress scintigraphy in patients with stable angina pectoris, I-43
- The pathophysiology of angina pectoris and the effect of lidoflazine, I-27

M

Medical management
Comparison of medical and surgical management of coronary artery disease: methodologic issues, II-32
Comparison of survival of medically and surgically treated coronary disease patients in Seattle Heart Watch: a nonrandomized study, II-53
Exercise testing as part of the reasonable workup before recommending medical or surgical therapy for coronary heart disease, II-15
Medical management of the patient with angina pectoris: an overview of the problem, II-3
The reasonable workup before recommending medical or surgical therapy: an overall strategy, II-21
Survival of coronary artery disease patients with stable pain and normal left ventricular function treated medically or surgically at Duke University, II-49
Membranes, phospholipid
Ion channels in membranes, I-2
Myocardium
Institutional variation of coronary artery bypass graft surgery: emphasis on myocardial protection, II-85
Ion channels in membranes, I-2
Results of myocardial revascularization: a 12-year experience, II-37

N

Nifedipine
Beneficial effects of nifedipine on regional myocardial blood flow in patients with coronary artery disease, I-32

O

Observational data banks
Problems and advantages of an observational data base approach to evaluating the effect of therapy on outcome, II-27

P

Propranolol
Superiority of verapamil to propranolol in stable angina pectoris: a double-blind, randomized crossover trial, I-51

S

Saphenous vein
Changes in grafts and coronary arteries after saphenous vein aortocoronary bypass surgery: results at repeat angiography, II-90
Institutional variations in influencing results: arterial versus venous grafts, II-81
Seattle Heart Watch
Comparison of survival of medically and surgically treated coronary disease patients in Seattle Heart Watch: a nonrandomized study, II-53
Surgical management
Comparison of medical and surgical management of coronary artery disease: methodologic issues, II-32
Comparison of survival of medically and surgically treated coronary disease patients in Seattle Heart Watch: a nonrandomized study, II-53
Exercise testing as part of the reasonable workup before recommending medical or surgical therapy for coronary heart disease, II-15
Management of the patient with coronary artery disease. A surgeon's perspective, II-13
The reasonable workup before recommending medical or surgical therapy: an overall strategy, II-21
Survival of coronary artery disease patients with stable pain and normal left ventricular function treated medically or surgically at Duke University, II-49
Survival rates
Comparison of survival of medically and surgically treated coronary disease patients in Seattle Heart Watch: a nonrandomized study, II-53
Prospective randomized study of coronary artery bypass surgery in stable angina pectoris: a progress report on survival, II-67
Survival after coronary artery bypass surgery in specific patient groups, II-43
Survival of coronary artery disease patients with stable pain and normal left ventricular function treated medically or surgically at Duke University, II-49
The Veterans Administration Cooperative Study of Stable Angina: current status, II-60

T

Thallium-201
The effects of lidoflazine on exercise performance and thallium stress scintigraphy in patients with stable angina pectoris, I-43
Therapy, evaluation of
Comparison of medical and surgical management of coronary artery disease: methodologic issues, II-32
Considerations in evaluating new antianginal drugs, I-38
Problems and advantages of an observational data base approach to evaluating the effect of therapy on outcome, II-27

V

Vascular smooth muscle
Calcium-entry blockers and vascular smooth muscle, I-11
Verapamil
Superiority of verapamil to propranolol in stable angina pectoris: a double-blind, randomized crossover trial, I-51
Veterans Administration Cooperative Study
The Veterans Administration Cooperative Study of Stable Angina: current status, II-60
